Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejection under 35 U.S.C. 112, 2nd paragraph

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 13 contains the trademark/trade name Tween 80. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe tensoactive agent and, accordingly, the identification/description is indefinite.

Claim Rejection under 35 U.S.C. 103(a)

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-6,8,10,12,14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pittenger (US 5,827,740; 10/27/98), Song (US 5,834,032; 11/10/98), and Astrup (US 5,422,352; 6/6/95). Pittenger discloses a composition comprising dibutyryl cAMP, phosphodiesterase inhibitor (theophylline, caffeine), and adenylyl cyclase (forskolin). Pittenger teaches that the composition can be used to treat obesity as it relates to diabetes. See abstract, claims. Pittenger does not suggest or teach the instant composition comprising isoproterenol (adrenergic receptor) or arachidonic acid. However, Song teaches a composition for treating diabetes / obesity comprising arachidonic acid. See abstract, claims 13 and 17. And Astrup teaches a composition for treating diabetes / obesity comprising isoproterenol. See abstract, column 6 lines 49-64. It would have been obvious at the time the invention was made to combine the prior art compositions. One would have been motivated to do this since each composition individually is taught to treat obesity as it relates to do diabetes. In a claim to a composition, a statement to the intended use of the composition's components has no patentable significance.

Claim Objection

Claims 7,9,11 are objected to do as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach or suggest the instant composition comprising the components of these claims.
